Professional Summary

Certified Power Platform Developer with over 5 years of hands-on experience in designing, developing, and deploying secure, scalable solutions using PowerApps, Power Automate, and Power BI. Proven expertise in building user-centric applications that streamline business processes, automate manual workflows, and deliver actionable data insights across diverse industries including cybersecurity, manufacturing, logistics, and finance.

Adept at collaborating with global stakeholders, managing end-to-end development cycles, and integrating Microsoft and third-party services through API connectors and Azure capabilities. Passionate about innovation, problem-solving, and delivering sustainable digital transformation through intelligent automation.

Key Skills

- Power Platform Tools: PowerApps, Power Automate, Power BI, Copilot
- Data Integration: SQL Server, PostgreSQL, SharePoint Online, Excel, Dataverse, Azure Data Factory
- Azure Services: Logic Apps, Function Apps, Storage Accounts, Azure Data Factory
- Other Expertise: Role-Based Access Control, Custom API Integration, AI Builder, Agile & DevOps, SIT/UAT, Documentation, User Training, Requirement Gathering

Certifications

- PL-400: Microsoft Power Platform Developer
- PL-900: Microsoft Power Platform Fundamentals
- MS-900: Microsoft 365 Fundamentals
- AZ-900: Microsoft Azure Fundamentals
- AI-900: Microsoft Azure AI Fundamentals

Professional Experience

Deloitte India

Consultant – Senior Power Platform Developer

Client: Adidas Germany | ABB India | Cybersecurity Domain

Oct 2023 – Feb 2026 | Bengaluru, India

- Designed and deployed enterprise-grade solutions to automate vulnerability assessment and penetration testing workflows across global business units.
- Developed role-specific Power BI dashboards and KPI reporting modules to monitor team performance and risk metrics.

- Implemented centralized data pipelines using Power Automate and Azure Data Factory to consolidate inputs from Excel, SharePoint, and external tools.
- Integrated third-party cybersecurity APIs using custom connectors and secured access using role-based permissions in SharePoint and PowerApps.
- Created five custom Canvas Apps and over ten Power Automate flows to automate user interactions, reminders, reporting, and compliance checks.
- Used AI Builder to extract structured data from PDF reports, enhancing data processing and insights.
- Coordinated directly with clients to gather requirements and delivered secure, scalable solutions supported by user documentation and training.

Highlighted Project: WAPT – Web Application Penetration Test Governance Tool

- Delivered a full-cycle solution to automate test tracking, streamline communications, and improve decision-making.
- Developed 5 PowerApps, 10 automated workflows, and 3 interactive dashboards.
- Achieved enhanced security through RBAC, reduced manual data errors, and improved test compliance monitoring.
- Enabled proactive event scheduling and reporting with embedded calendar views and email-based alerts.

Highlighted Project: WAS – Web Application Vulnerability Scanning Tool

- Built a robust automation system to retrieve scan results from third-party security tools via custom API connectors and Power Automate.
- Parsed and transformed vulnerability data for analytics using Snowflake as the primary database and visualized the output in Power BI.
- Integrated with ServiceNow to auto-generate tickets for high-priority vulnerabilities, improving triage and response times.
- Enabled real-time visibility into scan compliance and vulnerability resolution using automated email workflows and dashboards.
- Strengthened ABB's cyber posture by aligning solution workflows with internal risk frameworks and audit processes.

Tata Consultancy Services (TCS)

System Engineer – Power Platform Developer

Client: Nokia Finland

May 2021 – Sept 2023 | Chennai, India

- Automated complex invoice generation processes using TypeScript-backed Excel scripting and Power Automate.
- Built PowerApps integrated with SharePoint for internal auditing, logistics, accounting, and manufacturing processes.
- Designed real-time Power BI dashboards to visualize key metrics and reduce dependency on manual reporting.
- Led stakeholder requirement-gathering sessions, aligned outcomes with business goals, and delivered high-performance apps.
- Trained internal teams on Power Platform use cases, development best practices, and sustainability guidelines.
- Followed Agile methodologies and DevOps practices, including SIT, UAT, and deployment documentation.

Key Projects:

- MDM (Internal Auditing Tool)
- Webship (Logistics and Customs Clearance System)
- OneTracker (Accounting Workflow Automation)
- RRB (Manufacturing Efficiency Reporting Tool)

Education

Bachelor of Technology (Information Technology)

SRM Easwari Engineering College

Awards

Star of the Quarter Award

Recognized for independently delivering multiple critical Power Platform projects within tight timelines and maintaining quality without delays or escalations.

Contributions

- Shared platform expertise internally by conducting demos and technical discussions with peers.
- Actively participated in over 10+ interviews for Power Platform hiring across firm verticals.
- Delivered financial literacy training for underprivileged school children as part of the firm's Impact Day initiative.
- Contributed to additional POCs and client-facing projects (DOA, SMART) by mentoring team members and building reports.
- Regularly supported weekend releases and worked extended hours to meet urgent client needs.
- Received appreciation from ABB's internal teams for responsiveness and delivery quality.
